Field Engineer (all genders)

(Fulltime/ 38.5 hrs)

You support the worldwide installation and commissioning of our CellCubes, taking part in our joint contribution towards the global energy transformation.

Your responsibilities:

- Preparation, planning and execution of international installation, commissioning, and maintenance works.
- Set-up and configuration of individual components.
- Provide assistance in case of malfunction or failure, remotely or in the field.
- Provide active customer support in a technical environment.
- Support in the development and implementation of remote O&M initiatives, such as virtual reality inspection.

Your profile:

- You have a sound technical education in related fields such as electronics, electrical engineering, mechatronics, or automation technology (Technical College, or University of Applied Sciences).
- You have at least 2 years of professional experience in assembling electromechanical machines or systems, as well as their commissioning or repair.
- You are proficient with the parameterization of control systems and are skilled in reading systems and circuit diagrams.
- You have an international mindset: a high willingness to travel, very good German and English skills (spoken and written), and any other language is an advantage.
- You are solution-oriented, a strong team player, skilled in dealing with customers and have a strong quality and health & safety awareness.

Our offer:

- Leading technology in the field of electrochemical long-duration energy Storage, with exciting and challenging tasks in a future-oriented industry.
- A respectful, appreciative atmosphere where cooperation is held in high esteem.
- A young, innovative, and sympathetic team.
- Career development opportunities along the entire product lifecycle.
- An attractive gross salary starting at € 57.000,00/year, on an all-in basis. Depending on professional qualifications and experience, a significant overpayment is possible.
