Project Manager Australia (all genders) (Full-time / Hybrid)

You are our first person on the ground and ensure our customer and service projects are managed successfully regarding all technical and commercial aspects.

Your responsibilities:

- You bear technical and commercial responsibility for our Australian energy storage infrastructure projects.
- You ensure our projects are successfully managed in compliance with cost, time, and quality.
- You adhere to safety and environmental standards including legal requirements during the planning and implementation of your projects.
- You support our business development team during the bidding and contracting phase.
- You work in close collaboration with our Sales, Production, and Projects and Services departments.

Your profile:

- You have an avid interest and enthusiasm for renewable energies, especially energy storage.
- You possess a bachelor's or master's degree from a technical education, preferably electrical, or mechanical engineering.
- You have a minimum of 5 years of meaningful professional experience as a project manager in leading technical roles and you are ready for your next career step.
- You are a leader with high emotional intelligence, excellent numeracy, and literacy skills, with a track record in infrastructure or plant engineering EPC-projects.
- You have an excellent command of the English language and ideally a good command of the German language.

Our offer:

- Leading technology in the field of electrochemical Long-Duration Energy Storage, with exciting and challenging tasks in a future-oriented industry.
- The opportunity to help us set foot on the Australian market
- A respectful, appreciative atmosphere where cooperation is held in high esteem.
- A young, innovative, and sympathetic team.
- An attractive gross salary, on an all-in basis. Depending on professional qualifications and experience, a significant overpayment is possible.
